

## HUNARDEEP SINGH

Calgary, Alberta | [dhillionhunar@gmail.com](mailto:dhillionhunar@gmail.com) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

### PROFESSIONAL SUMMARY

---

Adaptable and results-oriented junior software developer with hands-on experience in ReactJS, C#, Python, and SQL, including integration with Firebase and cloud-hosted systems. Experienced in working on full-stack web applications in both independent and team environments. Passionate about building scalable, real-world systems, resolving bugs, and continuously improving code quality and performance.

### SKILLS

---

**Languages & Frameworks:** ReactJS, AngularJS (familiar), C#, Python, .NET MAUI  
**Databases & Backend:** SQL, Firebase Firestore, Node.js, Express, REST APIs  
**Tools & Practices:** Google Firebase, AWS S3, Vercel, GitHub Actions, Visual Studio  
**Other** UI/UX, Communication, Problem Solving, GCP (familiar with cloud storage & deployment)

### WORK EXPERIENCE

---

#### THE BRDGE

10/2024 - Present

Full Stack Developer (Part-Time)

- Developed and maintained features for a real-time meal service platform using ReactJS, TypeScript, and Node.js.
- Integrated and queried Neon SQL database and implemented storage workflows via AWS S3.
- Deployed updates through CI/CD pipelines using Vercel and collaborated closely with stakeholders for business-aligned delivery.
- Focused on debugging, code quality, and implementing scalable improvements to the user experience.

### PROJECTS

---

#### Jokes Website

05/2025 – 06/2025

C# ASP.NET, SQL Server

<https://github.com/hunardeep720/JokesWebsite.git>

- Designed a full-stack web app with complete CRUD functionality, leveraging ASP.NET and SQL to manage joke entries.

#### Student Scoops

05/2024 – 08/2024

ReactJS, Next.js, Firebase Auth + Firestore

<https://github.com/hunardeep720/studentscoops>

- Built a multi-role food ordering platform with secure authentication and real-time database integration using Firebase.
- Developed mobile-first UI using modern frameworks and actively contributed to team-based implementation.

#### Deal Hives

02/2024 – 04/2024

ReactJS, Firebase, Amazon API

<https://github.com/hunardeep720/dealHives>

- Built an e-commerce aggregator with search, filtering, and product integration via external APIs.
- Managed authentication and state using Firebase, React Context, and Firestore.

#### Raj Robot Rentals

05/2023 – 06/2023

.NET MAUI, C#

<https://github.com/hunardeep720/RajRobotRentals>

- Developed a desktop app for renting robots with flexible time options, integrating form handling and pricing logic.

### EDUCATION

---

#### Diploma in Software Developer

01/2023 – 08/2024

Southern Alberta Institute of Technology (SAIT)

### CERTIFICATIONS

---

GitHub Essential Training (Skills in version control and collaboration)
